|--|----------------|
| <p>to our grocery stores from all over the world. In this book, we show how, with just a little effort, you can augment your landscape with edibles of every description in an environmentally sustainable manner.</p> | |
| <p>Emergency First Aid: Waterford Press A pocket field guide designed to help with the recognition and treatment of many medical emergencies.</p> | \$5.50 |
| <p>Family Butterfly Book (The): Discover the Joy of Attracting, Raising & Nurturing Butterflies: Rick Mikula Everyone enjoys seeing butterflies flitting about on a warm summer day, but few people realize that many species are endangered. Without help, nine out of ten caterpillars won't survive long enough to become butterflies. Though many of us know that caterpillars turn into butterflies, this book explains the transformation from start to finish - egg to caterpillar to chrysalis to butterfly - and reveals where each stage can be found in the wilds of our own backyards. With stunning color photographs and detailed illustrations, the author explains how to attract, safely catch and handle, and raise and support butterflies. He also discusses how to make irresistible habitats for butterflies and emphasizes the importance of basking sites, water sources, and shelter. Did you ever want to hand-feed a butterfly? Have a live-butterfly tree? Feature butterflies in special celebrations? This book also features many do-it-yourself projects that can be completed for under \$10.00.</p> | \$14.50 |
| <p>Fandex Birds: Michael W. Robbins Bringing the world of Birds to your fingertips, Fandex presents the ideal field guide. The images are large, the details sharp, the colors bright. Each die-cut profile is unmistakable - it's like having the real bird in your own hand. There are instantly accessible details about each bird's habitat, range, diet, nest, eggs and conservation status, as well as appearance, habitats and even song pattern, Plus pigeon milk and the Indigo Bunting's ability to navigate by starlight, & how the Killdeer fakes injury to distract predators. 50 individually uniquely shaped die-cut cards.</p> | \$9.00 |
| <p>Fandex Butterflies: Rick Mikula The Great Egg-fly, which flies over 1,400 miles over water from Australia to New Zealand. The prism-winged Blue Morphos, believed by some Amazon tribes to be bits of fallen sky. The African Giant Swallowtail, with a 12-inch wingspan, and the fingernail sized Pygmy Blue. Bringing the fascinating world of butterflies to your fingertips, <i>FANDEX</i> presents a field guide to 50 of these vibrant and graceful creatures. Each entry features a die-cut, full-color image that makes identification simple and conclusive, plus additional photographs of the insects, often as caterpillars and pupae. Lively text covers life cycle, diet, habitat, gender variations, and the secrets of butterfly survival: camouflage, poison, and mimicry.</p> | \$9.50 |
| <p>Fandex Trees: Steven Aronson Bringing the world of TREES to your fingertips, <i>FANDEX</i> presents a foolproof field guide. Four visual keys--die-cut leaf, bark pattern, flower, nut or seed, and photo of the full tree--plus descriptions of habitat and more combine to give a complete picture of North America's forest and backyard trees. In addition, <i>TREES</i> is a cultural history--of the mighty White Oak, California Redwood, Aillanthus, the tree that grows in Brooklyn, and the stately White Ash, as important for the bows of early Native Americans as for the baseball bats of today.</p> | \$9.00 |
| <p>Fandex Wildflowers: Ruth Rogers Clausen Bringing the world of North American wildflowers to your fingertips, <i>FANDEX</i> presents a field guide that's as beautiful, practical and intriguing as the flowers themselves. Die-cut images are sharp, the colors true, shapes life-like identification is guaranteed. Plus a quick chart of vital stats includes family name, life cycle, range, and habitat. Accompanying entries cover the history and cultural significance of each plant. Columbine's use as a love charm, the wars fought over Wild Hyacinth, the medicinal power of White Sage and detail its use in the home garden.</p> | \$9.00 |
| <p>Field Guide Trees – DK Pocket guide systematically organized for easy access to information. Covers worldwide types of habitat.</p> | Sale \$4.00 |
| <p>Fresh Food From Small Spaces: R. J. Ruppenthal This book provides readers with the knowledge and skills necessary to produce their own fresh vegetables, mushrooms, sprouts, and fermented foods as well as to raise bees and chickens--all without reliance on energy-intensive systems like indoor lighting and hydroponics. Readers will learn how to transform their balconies and windowsills into productive vegetable gardens, their countertops and storage lockers into commercial-quality sprout and mushroom farms, and their outside nooks and crannies into whatever they can imagine, including sustainable nurseries for honeybees and chickens. Free space for the city gardener might be no more than a cramped patio, balcony, rooftop, windowsill, hanging rafter, dark cabinet, garage, or storage area, but no space is too small or too dark to raise food. With this book as a guide, people living in apartments, condominiums, townhouses, and single-family homes will be able to grow up to 20 percent of their own fresh food using a combination of traditional gardening methods and space-saving techniques such as reflected lighting and container terracing. Those with access to yards can produce even more.</p> | \$20.00 |

| | |
|--|---------------------------------------|
| <p>Garden Ferns, The Plantfinder's Guide to: Martin Rickard A comprehensive introduction to ferns, from the dramatic giant tree ferns to the delicate filigreed maidenhairs. 1 copies available</p> | <p>Sale \$18.00</p> |
| <p>Gardening in Deer Country : Vincent Drzewucki Jr. Deer...you love them or you hate them, but no matter what, deer have an appetite for delicious plants we plant in our garden and around our home. You've seen the residue in the morning: spiked hostas, chomped impatiens, mangled hydrangea. How can an animal that cute be so hungry? Fences and sprays and dogs just don't go far enough and most people stop short of venison surprise for dinner.</p> | <p>\$9.50</p> |
| <p>Gardening in Small Spaces, Fine Gardening Design Guides: Practical advice and innovative ideas for creating wonderful gardens out of small areas. Ideas you may not have thought possible. 2 copies available</p> | <p>Sale \$12.00</p> |
| <p>Gardening With Prairie Plants: Sally Wasowski Filled with practical advice and detailed information on creating beautiful native landscapes. This indispensable guide to prairie gardening shows readers how to choose space, plan a garden, select plants and flowers, and much more.</p> | <p>\$26.50</p> |

|--|---------|
| <p>LAKEscaping: Carrol L. Henderson This book shows how to plan and plant a diverse natural lakeshore landscape. Features information on how to restore wildlife habitat, wildflowers and clear water; preserve or restore the natural beauty that attracted you to lakeshore living in the first place. The principles and techniques in this book are also applicable for landscaping along rivers, streams and wetlands. Also features lakeshore rules and regulations for Michigan, Minnesota & Wisconsin</p> | \$16.50 |
| <p>Landscaping For Wildlife: Carrol L. Henderson Photos, charts, diagrams, and recommendations for landscaping yards, farms, and woodlots for wildlife.</p> | \$10.50 |
| <p>Lifecycle of Butterflies: Judy Burris & Wayne Richards For every person who has ever watched and marveled at the magic as a butterfly emerges from a chrysalis, this book is a treasure chest of amazing butterfly transformations. Readers are invited to explore and experience the life cycles of 22 common backyard butterflies, in this unique collection of stunning fullcolor, up-close photography, all taken in a live garden setting. From the Black Swallowtail to the Monarch, the Question Mark to the Painted Lady, each butterfly is shown from start to maturity, with sequential photographs of the egg, caterpillar, chrysalis, and emerging butterfly. Additional detail shots highlight caterpillar behavior, changes in the chrysalis as the wing pattern emerges, open- and closed-wing shots, and the color variations between the male and female butterflies. Tell how they created the ultimate butterfly havens in their own backyards, planting every kind of caterpillar host plant and nectar-producing flower imaginable. With cameras in hand, they set out on a mission to record the lives of all the butterflies that flocked to their gardens. Readers learn how they can create their own butterfly gardens, with specific host plants suggested for each species, most of which are found across North America. This richly visual guide to the life cycles of butterflies will appeal to wildlife enthusiasts, gardeners, school teachers, and families alike.</p> | \$14.50 |
| <p>Michigan's Bird Identification Cards: Waterford Press An introduction to familiar species. A pocket naturalist guide.</p> | \$5.50 |

Homeowners are realizing the health benefits derived from gardening and the increase in their home's property value. Contains easy to use advice on the top landscape plant choices (more than 160 entries) for Michigan. Recommends specific varieties and provides advice on how to plant, how to grow and how to care for Michigan's best plants. Plant selections from annuals to groundcovers, hardy bulbs, lawns, ornamental grasses, perennials, and much more.</p> | \$21.00 |
| <p>Michigan Ghost Towns: Of the Upper Peninsula: Roy L. Dodge Together these two books are an unparalleled and comprehensive collection of information on ghost towns in the Upper and Lower Peninsula of Michigan in the 20th century. There are thousands of such abandoned towns, each with their own story. These books relate the history of hundreds of these forgotten towns about which little or nothing has ever been written. Full of Michigan lore and legend, they include directions to each location, bibliographies, and many black-and-white historical and modern photographs for modern ghost town hunters.</p> | \$15.00 |
| <p>Michigan Ghost Towns of the Lower Peninsula (formerly Michigan Ghost Towns 1 & 2): Roy L. Dodge Michigan: the way it was. Michigan Ghost Towns compiles settlements and communities that have faded into Michigan's history and legend: Bamfield and Bryant were stations or stops on the AuSable & North Western Railway, a narrow gauge track extending from AuSable to Commins, in Oscoda County. In 1908 Charlie Cote, a Frenchman, was the only inhabitant of Bryant. Orral A. Wardlow, now living at Glennie (1970), said Charlie could feed and sleep half-a-dozen people and his place was modestly famous for his pea soup. Wardlow said Harry Garrett and Ray Rose were supervisors on the railroad. The train, which made one round trip daily, was made up of 20 to 25 bunk cars for hauling logs, and whatever boxcars were needed to haul freight, which was not much. The daily arrival of this train at Glennie was something to look forward to, and greeted by the whole town. Billie Ellis, the conductor, would go into Joe Solomon's general store and help himself to a smoked herring that was always handy on top of the counter, Wardlow said. I don't remember that he ever paid for one, and Joe never complained. It seemed to be a matter of course that Billie had his herring.</p> | \$15.00 |
| <p>Michigan's Herb Cookbook : Suzanne Breckenridge, Marjorie Snyder If you're interested in cooking with herbs and want to use the best of Michigan and the Midwest's seasonal foods, then this is the cookbook for you. The recipe section is written for both the novice and the more experienced cook. Each recipe has helpful information about serving suggestions and menu ideas. Scattered throughout the book are handy tips related to foods, herbs, and cooking. In addition, <i>Michigan Herb Cookbook</i> includes a section on herb growing and designing in which planting, growing, freezing, drying, and storage tips for over thirty herbs are explained in detail. You will find over 150 recipes in the book's seven</p> | \$20.00 |

|--|--|
| chapters. More than half are low-fat, and there are many vegetarian favorites. Also, a chapter devoted to condiments and little extras contains various herb blend, vinegar, chutney, pesto, and sauce recipes, such as Sun-Dried-Tomato Pesto and Roasted Red Pepper Sage Sauce. | |
| Michigan State and National Parks: Tom Powers A complete guide to camping including bird watching, bike trails, cross country skiing, and much more. Fourth edition | \$14.00 |
| Michigan Trees: Burton V. Barnes, Warren H. Wagner Now in its tenth decade of publication, <i>Michigan Trees</i> has been, since it was first introduced in 1913, the must-have reference book for anyone who wants to know about the trees of this unique North American region. In this new and updated edition, several new species have been added to the lineup, as well as sections on tree ecology and fall color. Written and illustrated in a style that appeals at once to academic botanists and armchair arborphiles alike, <i>Michigan Trees</i> gives readers everything they need to know for identifying trees in the Great Lakes state. Included with each description are fascinating notes and asides. Also includes a tree key and identification section illustrated with elegantly simple line drawings that reveal the tiny, signature details that make each tree unique. | \$16.00 |
| Michigan's Turtles and Lizards: James H. Harding & J. Alan Holman A field guide and pocket reference with large, color photos and different views for easier identification. | \$11.00 |

Written by a mountain biker for mountain bikers, this book has all the best single track trails. No tow-paths, no hike-n-bike trails: if it's paved, it's not here. 1 copy available | Sale \$9.50 |
| Mushroom Hunter's Field Guide: Alexander H Smith, Nancy Smith Weber Beginners as well as experts will be able to identify mushrooms in a matter of minutes. All of the mushrooms included are illustrated in beautiful color, adding visual enjoyment to the textual materials. The descriptions are tinged with wit and wisdom, making the use of this guide an enjoyable and rewarding experience. This edition of <i>The Mushroom Hunter's Field Guide</i> should be useful throughout the United States and Canada, but users should remember that each region has certain species peculiar to it, and it is impossible to include all of them here. The coverage is best for the Northeast, Great Lakes region, Rocky Mountains, and the Pacific Northwest. It includes most of the truly fine edible wild mushrooms, whether they are common or rare. It also includes the most dangerous ones in order that collectors may recognize them for what they are. Whether you are picking mushrooms to eat, or simply want to identify the many strange and beautiful mushrooms you find on walks through the woods, this field guide is highly recommended by American Horticulturalist; This is the mushroom forager's Bible. Don't go into the wilderness without it. | \$22.00 |

| Season's on the Au Sable: Rusty Gates Three miles downstream from Grayling, Michigan, is the Holy Water, a stretch of the Au Sable River that is some of the most storied trout fishing water in the country. One man, perhaps more than any other, has adopted this magical place as his own. In Seasons on the Au Sable, Rusty imparts his substantial knowledge of how to fly fish this blue-ribbon trout fishery. The Gates Au Sable Lodge is nestled along the banks of the Holy Water, and his legendary fly shop is a cast away from the Main Branch. His book begins with the most important month of the year--April, the season opener! It follows the progression of insect hatches that occur in northern Michigan, many unique to the Au Sable. Along with Rusty's stories and personal reflections on the river, the book includes practical advice such as which flies to use, the best time of day to fish, and what impact weather may have on hatches and fish activity. | \$21.00 |
| Small -Plot, High Yield Gardening: Sal Gilbertie, Larry Sheehan Are you tired of throwing away time, energy, and money on a perfectly manicured, water-guzzling, weed-producing lawn? Are you longing to feed your family in more healthful and eco-friendly ways but shocked by organic produce prices at the grocery store? Do you fantasize about growing your own food but hesitate to take on more than you can manage? If you answered yes to any of these questions, it's time for you to get down and dirty and take the plunge that will please your taste buds and your pocket-book! Gilbertie and Sheehan will help you turn your sprawling suburban acreage or postage stamp sized plot into a low-impact, all-organic, totally sustainable produce garden. You'll learn about the most effective natural fertilizers, drought-resistant cultivation methods, pest-repellent companion plantings, trends in heirloom herb and vegetable varieties, and raised-bed techniques for achieving maximum productivity in a limited space. You can even add a cutting garden so you'll always have fresh flowers on a kitchen table that's groaning under the weight of incomparably fresh vegetables | \$15.00 |
