Tree Shelters \$ 2.00 each		
Weed Fabric Squares \$12.50 for 10 - 3x3' squares with anchoring pins		

Carry total to page 10

THIS AND THAT DESCRIPTIONS

Bat House - Single chamber holds approximately 100 bats, triple chamber hold up to 300 bats. Weather resistant cedar built to OBC specs.

"Deep Water" Sign - 12"x 9" heavy white plastic with red letters.

Cocoa Fiber Mats - Approximately 17 inches in diameter. The center hole can accommodate a tree caliper up to 4 inches. The Cocoa Fiber Tree Mat greatly reduce moisture loss through dry summer months. You can expect virtually no weed competition for the first 1 1/2 to 2 years, after which the collar will slowly expand and breakdown while still maintaining some control for another year.

Fertilizer Tablets - Compressed, 10-gram, nutrient rich starter tablets supply all the nitrogen, phosphorus and potash needed by seedlings for 2 years. More nutrients released during growing season when bacterial activity is greatest. Use 1 tablet per seedling or transplant.

Flags - 4x5" fluorescent orange plastic on a 36" wire.

Mosquito Barrier - All natural garlic concentrate yard repellent, safe for children, pets, and aquatic life. One quart will cover 1.25 acres; one gallon will cover 5 acres. Very effective.

Plant Markers - Galvanized steel wire 10" tall with zinc labels. Labeling area 1" x 2 5/8" is firmly attached to the wires.

Plantskydd Repellent - This 100% natural repellent lasts 6 month in winter, 3-4 months in summer. Animals associate the odor with predator activity. A soluble powder or ready to use liquid. One-quart liquid spray protects 80 to 100 one foot high plants; five-quart liquid jug treats 400 to 600 one foot high plants; 1 lb. soluble powder treats 300 to 400 one foot high plants, applied as a spray with a pressurized hand-held or backpack type sprayer. Use for deer or rabbits.

Root Dip - (TerraSorb) A powder developed specifically for moisture retention. When mixed with water creates a gel that clings to a plant's roots. A 2-ounce bag will treat about 2,000 seedlings; fewer transplants or plants with larger root masses.

Tree Planting Bar - A fast, convenient way to plant seedlings. Tubular steel handle and shaft with wedge-shaped blade makes the hole just the right size. Not recommended for transplants.

Tree Shelters - Three straight wires (legs) push into the ground for stability, centered over the seedling, embedding the edge into the soil.

Weed Fabric Squares - A porous polypropylene fabric allows air, water & nutrients to pass through while controlling weed growth. Five staples are included to anchor mat to soil.

Monroe Conservation District
1137 South Telegraph Road, Monroe, MI 48161
(734) 241-7755 Ext. 3

NOTE: A service charge of \$5.00 per day will be charged for orders not picked up during designated times. After 3 days the order will be considered cancelled and money forfeited.

"It is unlawful for these trees, shrubs, and other plants to be resold with the roots attached, in accordance with the Insect Pest and Plant Disease Act, P.A. 189 of 1931, as amended."

A deposit of at least 25% must accompany this order
