

Rain Barrels: *a smart approach to clean, free water*

What are Some Advantages of a Rain Barrel?

Lawn and garden watering make up nearly 40% of total household water use during the summer. A rain barrel collects water and stores it for when you need it most - during periods of drought. It provides an ample supply of free "soft water" to homeowners and contains no chlorine, lime or calcium. This makes it ideal for watering gardens, flower pots, and car and window

washing or topping off a swimming pool. A rain barrel can save most home owners about 1,300 gallons of water during peak summer months. Saving water not only helps protect the environment, it saves you money and energy. Diverting water from storm drains also decreases the impact of runoff to streams and rivers. Therefore, a rain barrel is an easy way for you to help protect our natural resources and have a supply of clean, fresh water for outdoor use, for

FREE! Consider purchasing your rain barrel from the Monroe Conservation District where all your purchases are appreciated and

support our conservation efforts. For more information about these products go to www.upcycle-products.com or call us at (734)241-7755 ext. 3.

60 Gallon Black Rain Barrel with spigot, linking, and overflow fitting. Tax included.	\$79.50
55 Gallon Gray Rain Barrel with spigot, linking, and overflow fitting. Tax included.	\$79.50
